Suggested Student Grouping(s): Various	
Materials: blank 100 chart; 1-100 numeral tiles	
Activity Description: To begin, the instructor will draw 10 tiles and place them in their correct places on a blank 100 board. Players take turns drawing 7 numeral tiles from a bag. Then students will take turns placing tiles on the board in correct places. Each tile placed must be one more than a tile that has previously been placed on the board. If a player cannot play a tile then he/she must draw another one from the bag. The first player to get rid of all his/her tiles wins; or play can continue until the entire hundreds board is filled.	
Teacher Notes: As students become facile with "one more", the activity could be combined with "one less" and later extended to include "ten more" and "ten less".	

Evidence of Learning (Diagnostic Assessment of Progress):

Ask students to name the number that is one more than 65, 82, etc.
