

# Lesson Plan for KNP Activity

## M 4448.3: Tiling - Empty Area

<b>Teacher Planning Notes:</b>	
<b>Task Group Number:</b> 4448	<b>Task Group Name:</b> Tiling Rectangles
<b>Strand:</b> Multiplication and Division	<b>Activity Level and Color:</b> 3 Green
<b>KNP Activity Link with access to Printables and Student Instructions:</b> <a href="/knp/activity.php?id=4448.3&amp;prefix=M">/knp/activity.php?id=4448.3&amp;prefix=M</a>	
<b>Numeracy Target:</b> Count items arranged in equal groups with only group markers visible (items with groups are not visible) <a href="#">Numeracy Targets Chart</a>	
<b>Fluency Benchmark:</b> KY.3.OA.7 Fluently multiply and divide within 100.	
<b>Kentucky Academic Standard(s):</b> <a href="#">KY.3.MD.5</a> , <a href="#">KY.3.MD.7</a> , <a href="#">KY.3.OA.7</a>	
<b>Student-Friendly Learning Target:</b> I am learning to find the number of square tiles needed to cover a rectangle when only small edge marks are visible.	
<b>Suggested Student Grouping(s):</b> individual/partners	
<b>Materials:</b> Rectangle Cards; 1 Color Tile Piece; Dry-Erase Marker	
<b>Activity Description:</b> The student will choose a rectangle at random and determine the number of tiles it would take to cover the rectangle without gaps or overlaps. The student should then place the rectangle in a sheet protector and draw in the rectangles using a dry erase marker. The student will write the corresponding multiplication sentence. Be sure to print documents at "actual size" so that a 1 inch tile fits exactly in the gridlines.	
<b>Teacher Notes:</b>	
<b>Evidence of Learning (Diagnostic Assessment of Progress):</b> Place a 3 by 7 rectangle with edge marks only to indicate rows and columns. Show student how a 1 inch square tile will fit within marks. Ask student to determine the total number of tiles needed to cover the rectangle. Ask student to draw in the squares and write a matching multiplication sentence.
