

Printables for “Number Alien within 20”

KNPIG ID # Ni 1130.2 - RED

This file contains printables for a pair of students.

For each additional pair of students print one 1-20 row, one star marker, and one alien marker.

- 4 Two full rows (1-20) from hundred chart
- Each with 1 Star Marker and 1 Alien Marker.

Teacher Note: This activity challenges students to identify numbers in the range of twenty and to compare two numbers by telling if they are above or below one another in an abbreviated hundred chart.

Students are ready for this activity when they can determine the order of two numbers and can verbally tell whether numbers are before or after one another.

Materials Notes:

The first two rows of a hundred chart and two color chips may be substituted for the alien, star and printable number line if printing is not available.
