

Printables for “Make Ten”

KNPIG ID # S 2204.3 – GREEN

This file contains printables for two students.

For each additional student print 1 new game sheet.

- "Make Ten" game sheet - 3 different game sheets

Teacher Note: Alternatively, each student could be given a game board and students can race to circle all pairs on his/her game board. To play a version without speed, allow students to cooperatively circle pairs on one game board or work independently to find all of the pairs on a single game board.

- Game sheets can be laminated or placed in sheets protectors and used with wipe off markers to make game sheets re-useable.
