

Printables for “Problem Solvers”

KNPIG ID # S 2209.2 – BLUE

This file contains printables for two students.

For each additional pair of students print 1 new file.

- Library Question Cards (14)
- Cafeteria Question Cards (14)
- Playground Question Cards (14)
- Classroom Question Cards (14)
- 2 Picture Mats

Teacher must supply various manipulatives

Teacher Notes can be found on the lesson plan for this activity.

Question cards S2209.2 Library

<p>Four children were in the library. Three more children walked in. How many children are in the library now?</p>	<p>Six boys were in the library. Some more boys walked in. Then there were ten boys in the library altogether. How many boys walked in and joined the other six?</p>
<p>Some girls were in the library. Three more girls came into the library. Now there are nine girls in the library altogether. How many girls were in the library before the other girls came in?</p>	<p>Eight boys were in the library. Five boys walked out. How many boys were left in the library?</p>
<p>Nine children were in the library. Some children walked out. Then there were only four children in the library. How many children walked out?</p>	<p>Some teachers were in the library. Two teachers walked out of the library. Then there were only eight teachers in the library. How many teachers were in the library before some of the teachers walked out?</p>
<p>Six girls were in the library. Some more girls walked in. Now there are ten girls in the library. How many girls were already in the library before the others walked in?</p>	<p>Four boys and five girls were in the library. How many children are in the library?</p>
<p>Ten children were in the library. Two children were girls and the rest were boys. How many children were boys?</p>	<p>Some boys were in the library. Seven boys walked out of the library. Then there were only three boys in the library. How many boys were in the library before some of the boys walked out?</p>

Six girls and nine boys are in the library. How many more boys are in the library than girls?

Four boys and eight girls were in the library. How many more girls were in the library than boys?

There are six fewer girls in the library than boys. There are ten boys in the library. How many girls are in the library?

There are three more boys in the library than girls. There are seven girls in the library. How many boys are in the library?

Question cards S2209.2 Cafeteria

<p>Eight children were in the cafeteria. Two more children walked in. How many children are in the cafeteria now?</p>	<p>Five boys were in the cafeteria. Some more boys walked in. Then there were ten boys in the cafeteria altogether. How many boys walked in and joined the other five?</p>
<p>Some girls were in the cafeteria. Four more girls came in. Now there are nine girls in the cafeteria altogether. How many girls were in the cafeteria before the other girls came in?</p>	<p>Seven boys were in the cafeteria. Five boys walked out. How many boys were left in the cafeteria?</p>
<p>Ten children were in the cafeteria. Some children walked out. Then there were only four children in the cafeteria. How many children walked out?</p>	<p>Some teachers were in the cafeteria. Eight teachers walked out of the cafeteria. Then there was only one teacher in the cafeteria. How many teachers were in the cafeteria before some of the teachers walked out?</p>
<p>Four girls and three boys were in the cafeteria. How many children are in the cafeteria?</p>	<p>Some boys were in the cafeteria. Five more boys came into the cafeteria. Now there are eight boys in the cafeteria altogether. How many boys were already in the cafeteria before the other boys came in?</p>
<p>Ten children were in the cafeteria. Some children walked out. Then there were only three children in the cafeteria. How many children walked out?</p>	<p>Ten children were in the cafeteria. Six were boys and the rest were girls. How many girls were in the cafeteria?</p>

Eight girls and three boys were in the cafeteria. How many more girls were in the cafeteria than boys?

Six boys and nine girls were in the cafeteria. How many fewer boys were in the cafeteria than girls?

There are nine fewer boys in the cafeteria than girls. There are ten girls in the cafeteria. How many boys are in the cafeteria?

There were four more boys in the cafeteria than girls. There were six girls in the cafeteria. How many boys were in the cafeteria?

Question cards S2209.2 Playground

<p>Six children were on the playground. Two more children came. How many children are on the playground now?</p>	<p>Five boys were on the playground. Some more boys walked on. Then there were seven boys on the playground altogether. How many boys walked on and joined the other five?</p>
<p>Some girls were on the playground. Four more girls came. Now there are eight girls on the playground altogether. How many girls were on the playground before the other girls came?</p>	<p>Seven boys were on the playground. Four boys walked away. How many boys were left on the playground?</p>
<p>Ten children were on the playground. Some children walked away. Then there were only two children on the playground. How many children walked away?</p>	<p>Some children were on the playground. Seven children walked away. Then there was only one child on the playground. How many children were on the playground before some of the children walked away?</p>
<p>Ten children were on the playground. Five were girls and the rest were boys. How many boys were on the playground?</p>	<p>Some boys were on the playground. Five more boys came onto the playground. Now there are ten boys on the playground altogether. How many boys were already on the playground before the other boys came?</p>
<p>Ten children were on the playground. Some children walked away. Then there were no children on the playground. How many children walked away?</p>	<p>Some boys were on the playground. Seven boys walked away. Then there were only three boys on the playground. How many boys were on the playground before some of the boys walked away?</p>

Six girls and two boys were on the playground. How many more girls were on the playground instead of boys?

There were five more boys were on the playground than girls. There were five girls on the playground. How many boys were on the playground?

There were four fewer girls on the playground than boys. There were ten boys on the playground. How many girls were on the playground?

Seven boys and four girls were on the playground. How many more boys were on the playground than girls?

Question cards S2209.2 Classroom

<p>Five children were in the classroom. Three more children walked in. How many children are in the classroom now?</p>	<p>Two boys were in the classroom. Some more boys walked in. Then there were ten boys in the classroom altogether. How many boys walked in and joined the other two?</p>
<p>Some girls were in the classroom. Seven more girls came in. Now there are nine girls in the classroom altogether. How many girls were in the classroom before the other girls came in?</p>	<p>Nine boys were in the classroom. Five boys walked out. How many boys were left in the classroom?</p>
<p>Ten children were in the classroom. Some children walked out. Then there were only five children in the classroom. How many children walked out?</p>	<p>Some teachers were in the classroom. Nine teachers walked out of the classroom. Then there was only one teacher left. How many teachers were in the classroom before some of the teachers left?</p>
<p>Four girls were in the classroom. Some more girls walked in. Now there are ten girls in the classroom. How many girls were already in the classroom before the others walked in?</p>	<p>Some boys were in the classroom. Five more boys came in. Now there are nine boys in the classroom altogether. How many boys were already in the classroom before the other boys came in?</p>
<p>Ten children were in the classroom. Some children walked out. Then there were only three children in the classroom. How many children walked out?</p>	<p>Ten children were in the classroom. Four were girls and the rest were boys. How many boys were in the classroom?</p>

Seven boys and ten girls were in the classroom. How many fewer boys are in the classroom than girls?

There are eight fewer girls in the classroom than boys. There are ten boys in the classroom. How many girls are in the classroom?

Ten boys and six girls were in the classroom. How many more boys are in the classroom than girls?

There are five more girls in the classroom than boys. There are eight girls. How many boys are in the classroom?
