# Printables for "Make the Target (up to 15)" 

## KNPIG ID \# S 2268.4 - PURPLE

## This file contains printables for two students.

For each additional pair of students print 1 new set of Ten Frame Cards.

- Ten Frame Cards - numbered 5-10, 2 sets
- Ten Frame Cards - numbered 1-10, 1 set
-Teacher's needs to provide a numeral cube: Numbered: $11,12,13,13,14,15$

Teacher Notes: If using the ten frames included in the print link, hand-write the corresponding numeral on the reverse side.The first student must choose the first addend carefully so that the required second addend is available. Teacher may vary the cube to generate other target numbers. If desired, ten frames 1 to 10 may be used. Students can be asked to find other pairs of cards to make the same target number. If the activity is teacher led, the teacher can choose the target number and choose the first card (addend). Students will then determine the missing addend.
