

Printables for “Panel Dot Cards (dots unscreened)”

KNPIG ID # A 3340.1 – RED

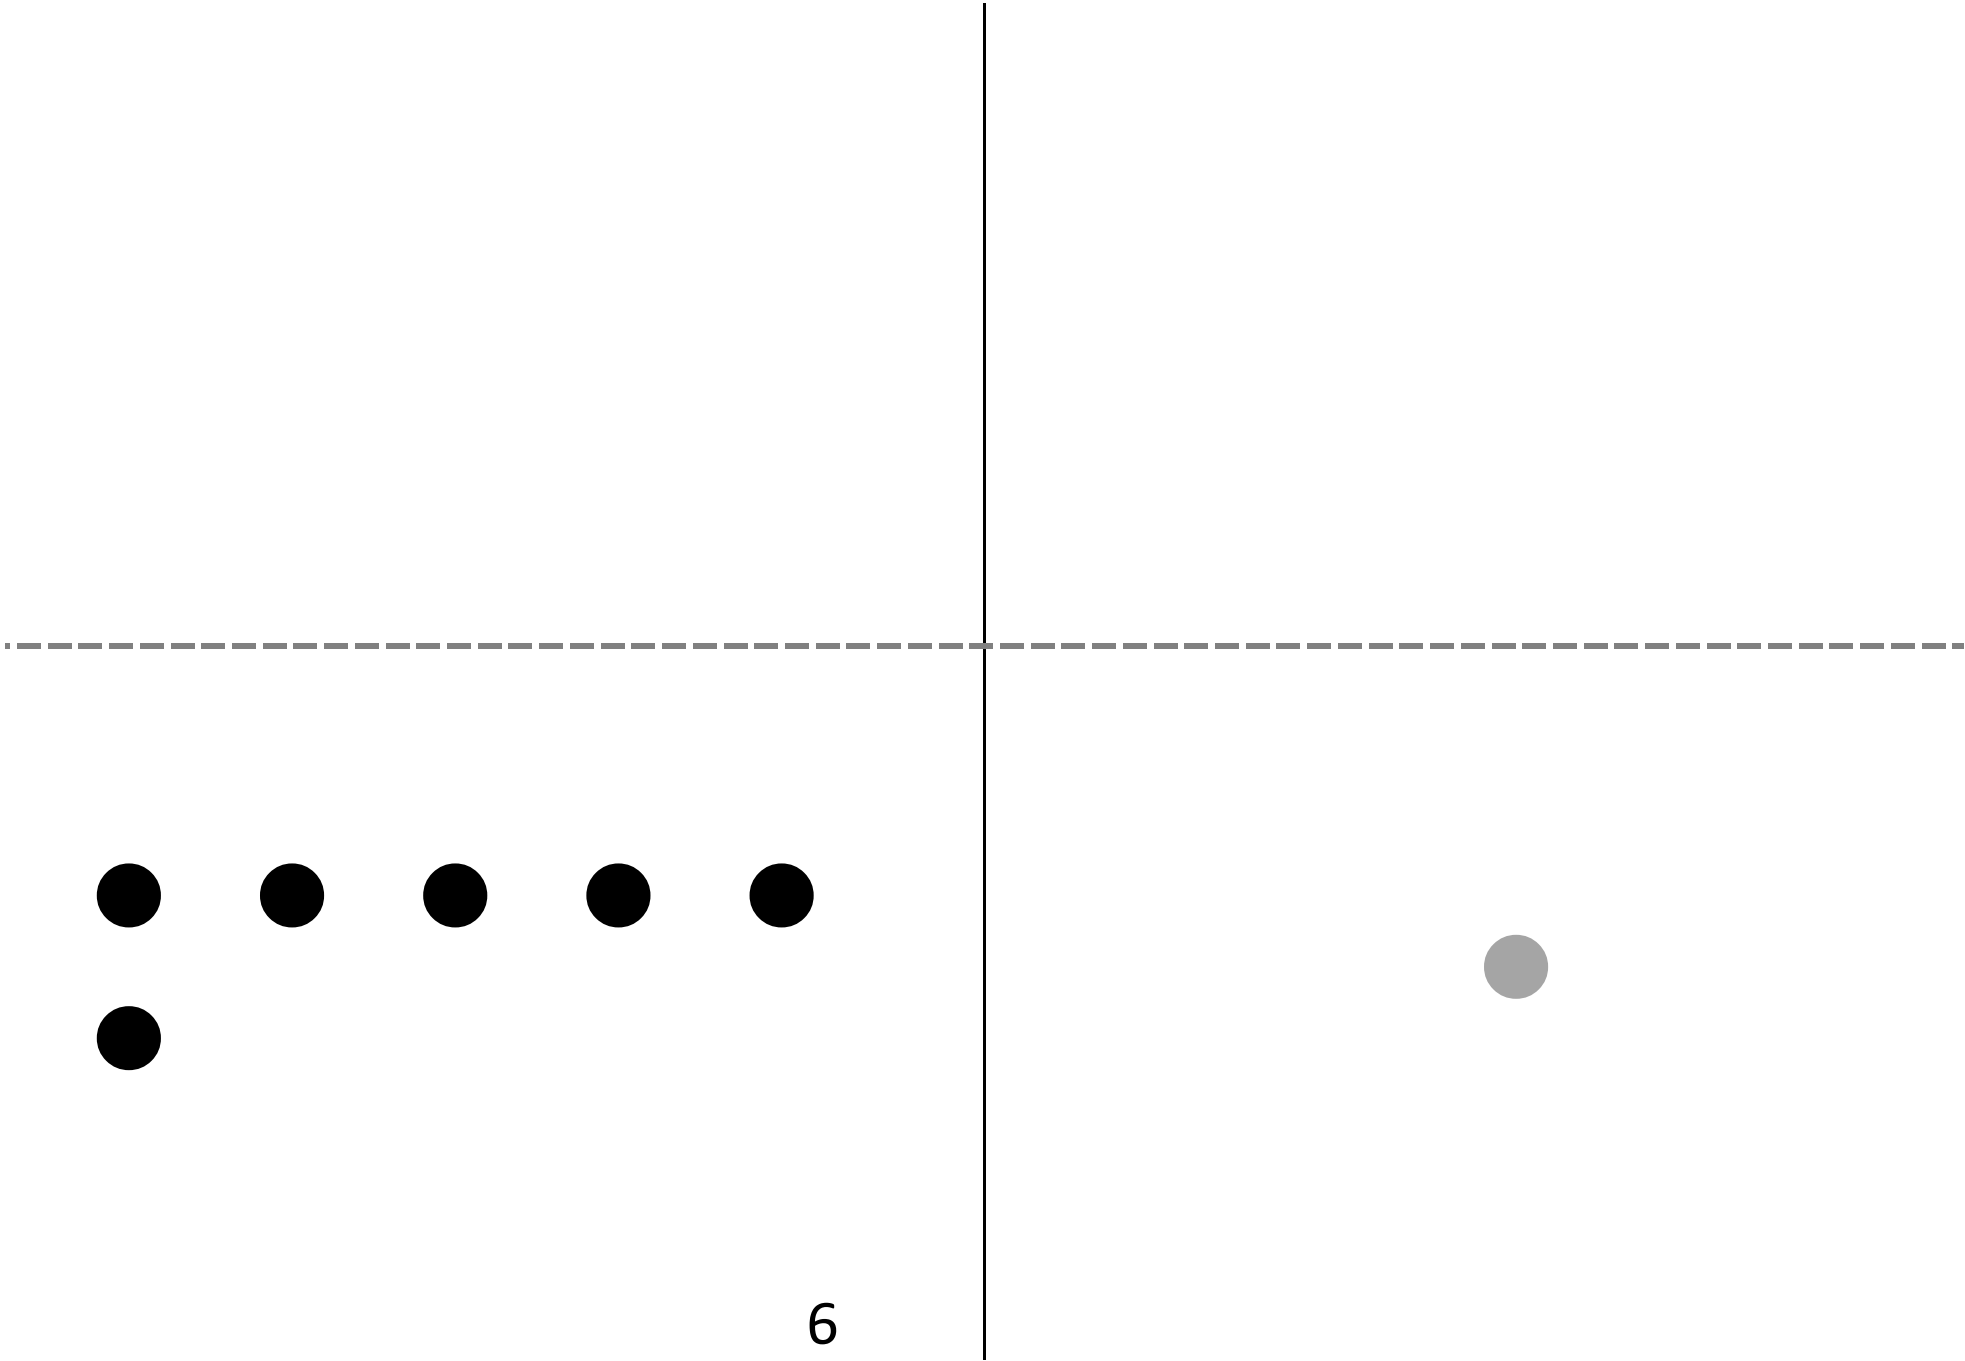

This file contains printables for a small group of students.

- 2-Panel Dot Cards - Level 2
-Teachers need to write the sum on the back of each card.

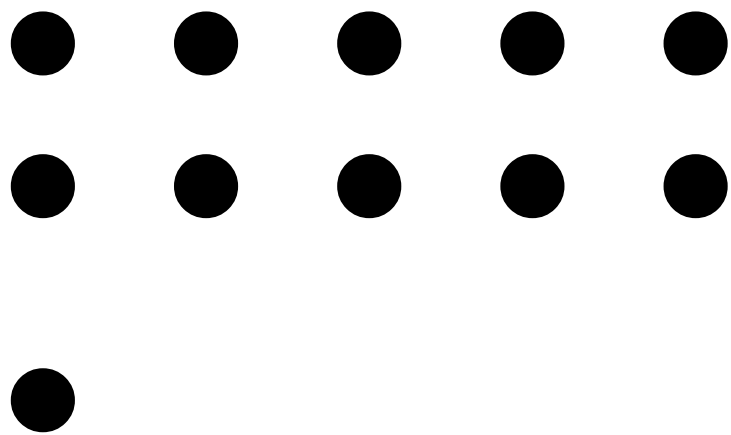

Teacher Note: "Use the print link to print the two panel dot cards. The same cards are used for A340.1 and A340.2. Fold the card in half lengthwise at the dotted line. Cut a slit in the top panel to create doors. The total may be written on the back for students to use as a check. If student is struggling with the number word sequence, it may be helpful to use some of the Nf activities to target that supporting skill. Note if student has 1 to 1 correspondence and can use the row structure of the first addend to keep track of which dots have been counted. If not, it may help student to work with a setting such as loose counters so that the student can move the objects."
