

Printables for "Solving Bug Word Problems"

KNPIG ID # M4404.5 - PINK

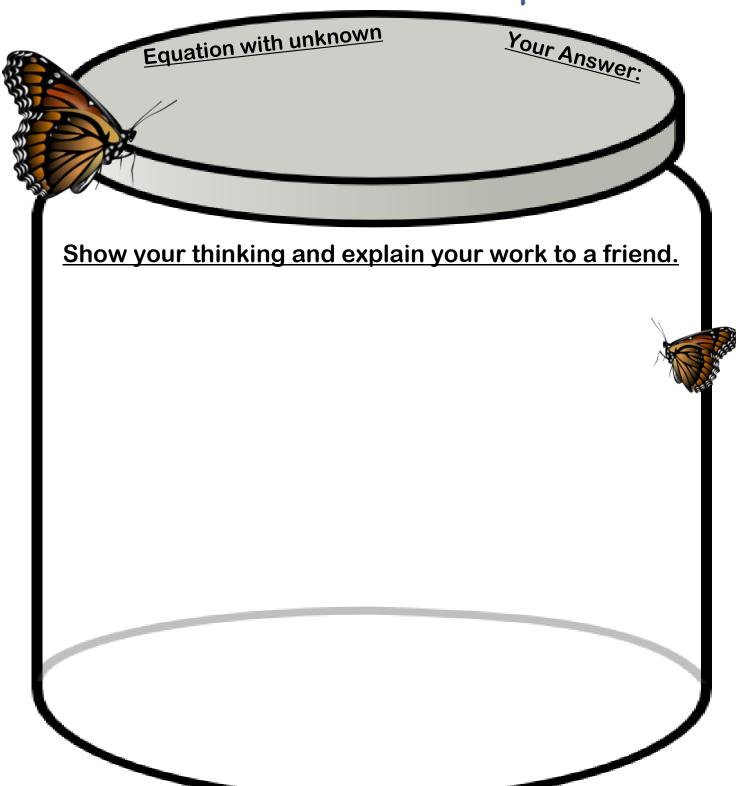

This file contains printables for up to five students.

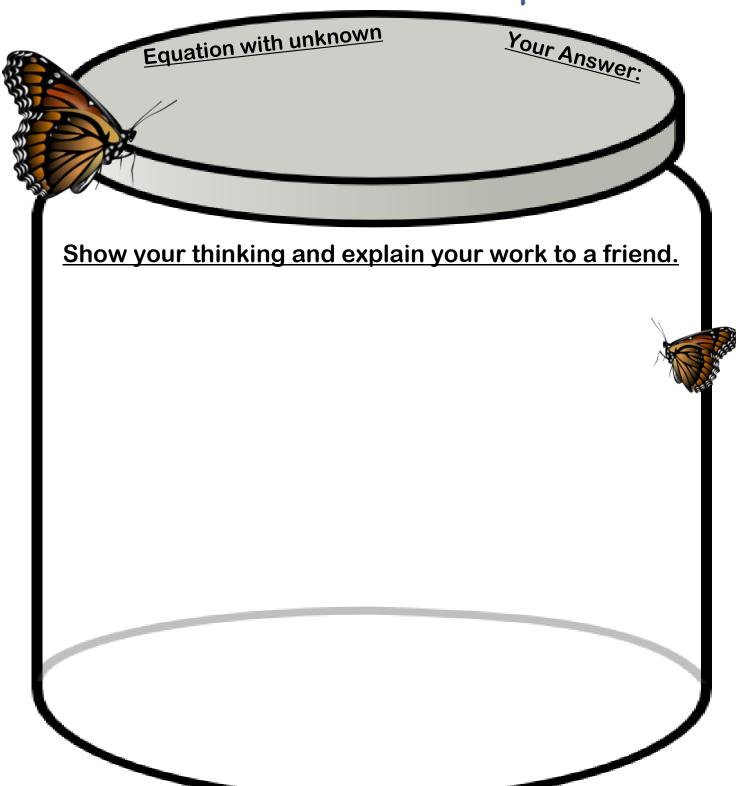

For each additional group of students print one new file.

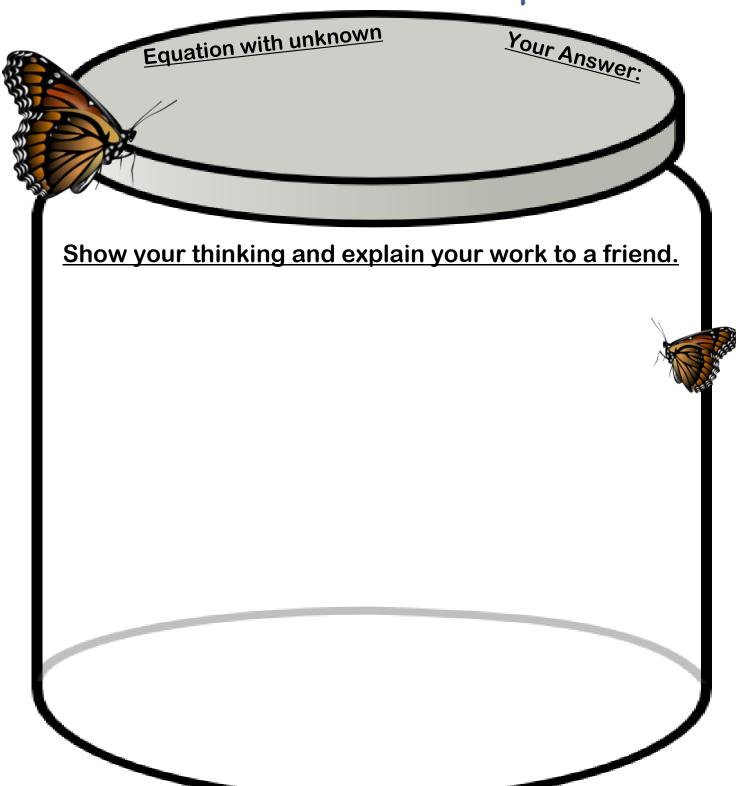

- 5 Buggin' Out Butterfly Work Mats
- Word Problem Cards: 30 cards in total, 2 sheets
 -15 Bee Game Cards & 15 Caterpillar Game Cards

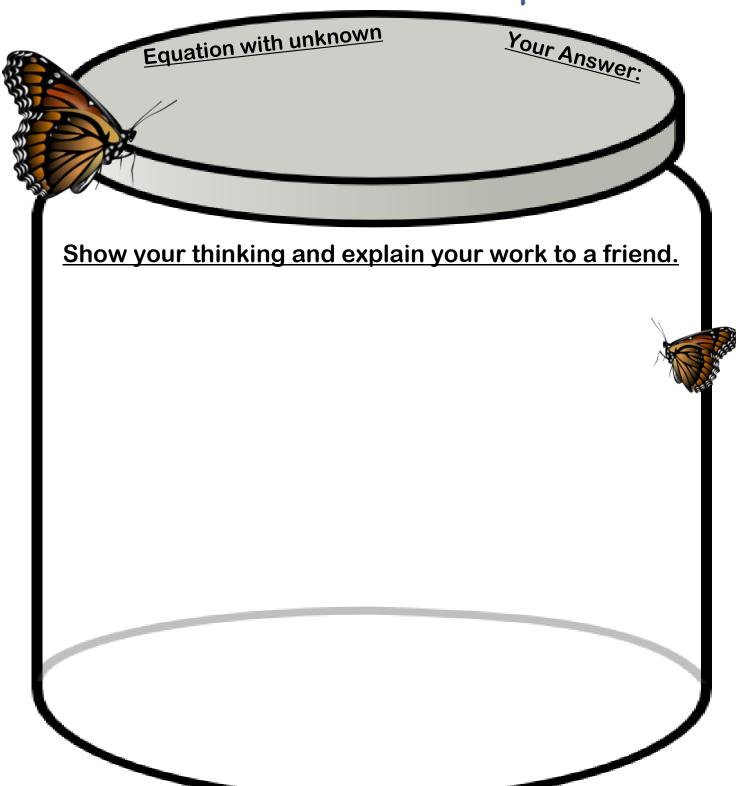

The teacher note for this activity can be found on the activity lesson plan.

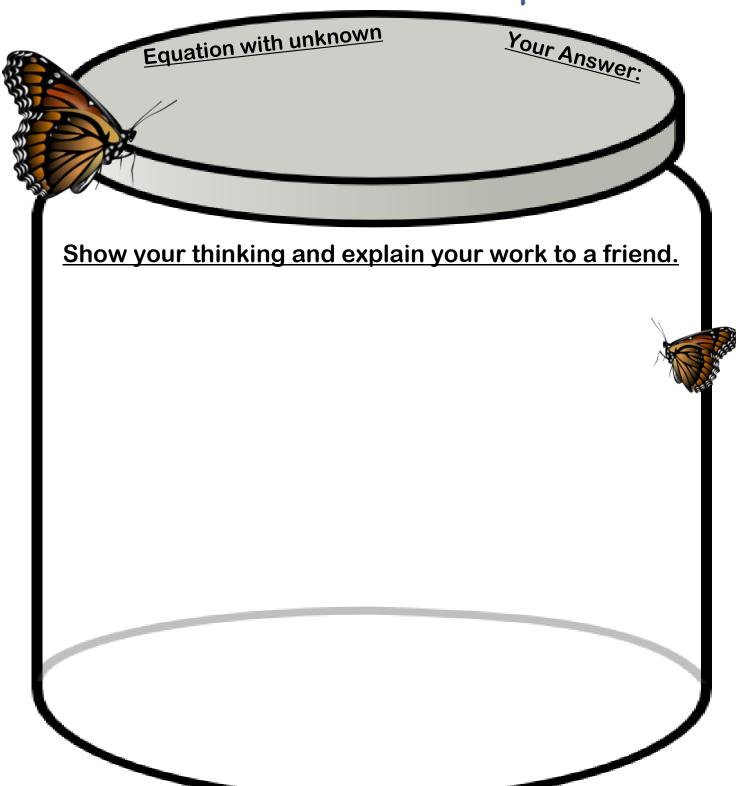

Created by Jordan Rhude & Emily Westerling, 2015

Some butterflies with four wings each are sitting on a flower. Hassan sees twentyeight wings. How many butterflies are there?

Twelve butterflies march in equal rows of three for the bug parade. How many rows of butterflies are there?

Twenty butterflies rest on a bush. That is four times as many than rest on the tree. How many

rest on the tree?

Kia sees some flies on a banana peel. She counts fourteen wings. If each fly has two wings, how many flies are there?

If there are eighteen flies arranged in two equal rows in Mrs. Grasshopper's class, how many flies are in each row?

Twice as many flies live in the trash can than the old tire. Ten flies live in the old trash can. How many flies live in the old tire?

Ick! Forty spider legs creep out from beneath a log. Each spider has eight creepy legs. How many spiders creep out from beneath the log?

Leslie points out

eighteen little ladybug

legs climbing up a vine?

Each ladybug has six

legs. How many

ladybugs are climbing

Mary the spider has twenty-four spider eggs arranged in equal rows of eight eggs. How many rows of eggs are there?

Seventy-two spiders hang from the ceiling. Eight times as many spiders hang from the ceiling than sit on the web. How many spiders sit on the web?

Mrs. Ladybug has her thirty children in five equal rows. How many ladybug children are in each row?

Forty-two ladybugs live in the woods. Six ladybugs live in the field. How many times more ladybugs live in

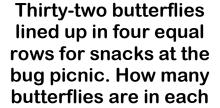

the forest than the field?

Twenty-four butterflies sipped nectar from yellow

flowers. Six butterflies sip

Gus the Grasshopper has to pack eight grapes with two in each bag. How many bags will Gus pack?

row?

from red flowers. How many times more butterflies sip from yellow than from red flowers?

Thirty-six butterflies flew in four equal sized groups. How many butterflies fly in each circle? Sixteen butterflies rest in four equal rows. How many butterflies are in each row?

Mr. Ladybug spent thirtytwo dollars on a hat. That is four times as much as Mrs. Ladybug spent on her hat. How much was Mrs. Ladybug's hat?

Three flies shared six apples equally. How many apples did each fly get?

If four flies are arranged into two equal rows, how many flies are in each row?

Marty Fly had twelve shoes. That is two times as much as Artie Fly. How many shoes does Artie Fly have?

Seven spiders caught fifty-six flies and shared them equally with each other. How many flies did each spider get?

If fifty-four ladybugs

split into nine equal

teams for the bug

games, how many

ladybugs will be on each

team?

Sixty-four spiders are divided into eight equal rows for the bug parade. How many spiders are in each row?

The gray spider web has sixteen spiders resting on it. That is twice as many as the white spider web. How many spiders are resting on the white web?

If Mr. Ladybug arranges thirty six flowers into six rows. How many flowers are in each row? The ladybug children went to the bug depot and bought candy. They now have fortyeight pieces. That is eight times as much as they had yesterday. How much candy did they have yesterday?
