

Printables for “Cups Game”

KNPIG # M 4436.2 – BLUE

This file contains printables for two students.

For each additional pair of students print 2 sets of Cup Cards.

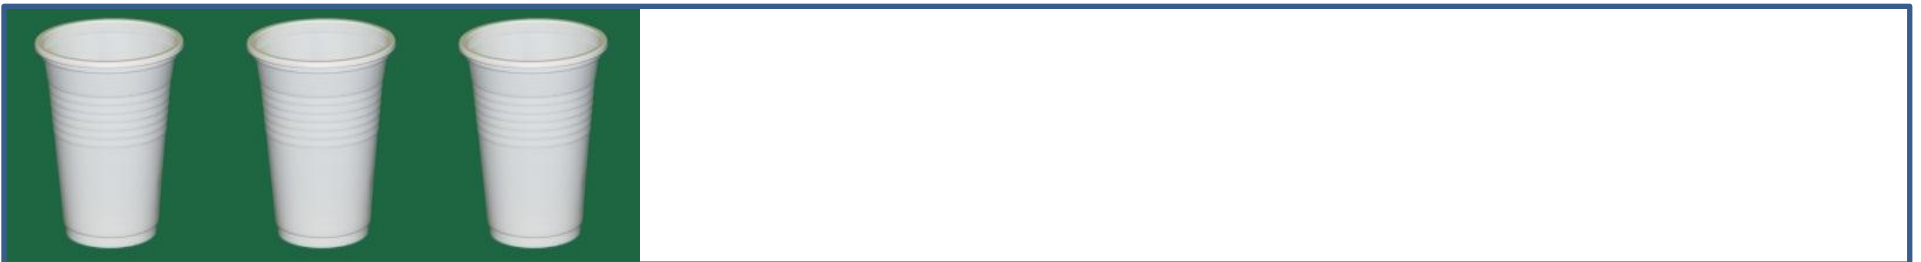

- Cup Cards – 2 Sets: Numbered 1 - 5

Teachers must also supply students with a dot die with 1 to 6 pips, beans, and a writing space.

Teacher Note: Students may wish to draw the beans on the cups instead of placing actual beans on the pictures of the cups. Instead of using the printed cup pictures indicating the number of groups, you may wish to use actual portion cups (indicated by a random numeral card chosen in the range 1 to 5 or by a spinner or different color number cube). Note students' counting strategies. Whereas some students will continue to count by ones, others will indicate awareness of the group structure by skip counting or emphasizing the final number word in each group. Awareness of the group structure reveals that students may be ready to count group markers while visualizing the hidden items in each group.

Cups Game (KNP 436)

Print on 8.5" x 11" card stock, cut out entire strips (leaving the blank space attached so that all cards are the same size) and laminate, one set per student. Pairs of students will then have 18 cards to use during play.
