

# Printables for “Mixed Rollers (within 100 with materials)”

KNPIG ID # T 5505.2 – BLUE

This file contains printables for five pairs of students.

For each additional pair of students print one score board and one set of number cards.

- 5 "Mixed Rollers!" Score Board
- 5 sets "Mixed Rollers!" Number Cards

**Teacher Note:** This activity challenges students to work with two digit numbers dealing with tens and ones simultaneously with use of materials. At the end of this task, they will feel comfortable solving two digit addition and subtraction tasks using jump strategies.

Students are ready for this activity when they understand that a ten is composed of ten ones and can solve addition and subtraction tasks dealing with tens or ones. This activity can be run as a small group activity. Just print more copies of the scoreboard for students to share in pairs.

#### Materials Notes:

Using a container to hold sticks and bundles will keep the students organized and prevent them from mixing their sticks and bundles with the center “reserve” of sticks and bundles.

You may substitute base 10 blocks for craft sticks. Students should become familiar with materials they can bundle, or group together, and break apart to clearly show how a ten is composed of ten units.
