

Printables for “Addition & subtraction cards”

KNPIG ID # T 5523.4 – PURPLE

This file contains printables for two students.

For each additional pair of students print 1 set of Addition and subtraction cards

- Addition and subtraction Cards- 4 Pages: 36 cards in total.

Print one set of Addition and subtraction Cards per pair of students.
Teacher need to supply students with a writing utensil and writing space.

Teacher Note: Present addition and subtraction problems as a string of related problems to allow students to consider using related facts as they develop efficient mental strategies for operations with 2 digit numbers. Although this learning experience appears to be different from the others in this task group, the learning objective (of becoming facile with conceptual place value and fluency with mental operations) is consistent.
