

Reading and Sequencing

I am learning to read the number words backward in the range 10 to 1, starting at any number in that range.

Materials:

numeral cards 1-10

Directions:

1. Put the number cards 1-5 in one stack and the number cards 6-10 in another stack.
2. Make sure both stacks are turned over where you can't see the numbers.
3. Turn the top card over from each stack.
4. Start counting **backwards** from the bigger number and stop when you get to the smaller number.
5. Keep doing this until all the cards are used.
