

## Sort and Sequence from 1 to 30

**I am learning to read the numerals 1-30 and count forward and backward 1-30.**

### **Materials:**

- numeral tiles 1-30 or numeral cards 1-30
- containers labeled "ones," "teens," "twenties," "thirties"

### **Directions:**

1. Scatter the cards face down at random on the table.
2. Take turns with a partner drawing a card and placing it in the appropriate decade family container.
3. After all cards have been placed, choose a number family, put the numbers in order and then read them forward and backward to your partner.
4. With cards still in order, turn 1 to 3 cards face down and say the numbers forward and backward again. Keep turning over 1-3 cards and saying the numbers until all the cards are face down.
