

Sort and Sequence from 30 to 99

I am learning to read the numerals 1-100 and count forward and backward 1-100.

Materials:

- numeral cards or tiles in any three or four decade groups (i.e., 30-59, 40-69, 60-99, etc.)
- containers labeled with each decade.

Directions:

1. Scatter the cards face down on the table.
2. Take turns with a partner drawing a card and placing it in the appropriate decade family container.
3. After all cards have been placed, choose a number family, put the numbers in order and then read them forward and backward to your partner.
4. With the cards still in order, turn 1 to 3 cards face down and say the numbers forward and backward again. Keep turning over 1-3 cards and saying the numbers until all the cards are face down. Use a numeral roll if you need help.
