

## Sequence numbers to 1,000

I am learning to read and put into order numerals in the range 1-1000.

### Materials:

a consecutive group of numeral cards spanning 1 to 3 decade families. (i.e. 340-369 or 835-844) in the range of 1 to 1,000.

### Directions:

1. Scatter the cards on the table.
2. Take turns with your partner picking a card and reading the number aloud.
3. Work with your partner to put the cards in order and then read the numbers forward and backward.
4. With cards still in order, turn 1 to 3 cards face down and say the numbers both forward and backward.
5. Continue turning over 1-3 cards and saying the numbers until most or all of the cards are face down.
6. For a challenge, model the number cards with arrow cards to show the numbers in expanded form.
