

100 board scrabble

I am learning to tell one more than a number in the range of 1-100.

Materials:

blank 100 chart; 1-100 numeral tiles

Directions:

1. Get blank 100 chart and tiles.
2. Player 1 draws 10 tiles and place them in their correct places on a blank 100 board.
3. Players take turns drawing 7 numeral tiles from a bag. Then students will take turns placing tiles on the board in correct places.
4. Each tile placed must be one more than a tile that has previously been placed on the board.
5. If a player cannot play a tile then he/she must draw another one from the bag.
6. The first player to get rid of all his/her tiles wins; or play can continue until all tiles are played.
