Number Before Race (within 10)

I am learning to say the number before any given number in the range 2 to 10.

Materials:

- Number Before Race (1 to 5) Game Board with cube labeled {2,3,3,4,4,5}
- OR Number Before Race (within 10) Game Board with cube labeled {5,6,7,8,9,10},
- Game tokens

Directions:

1. All players begin with a token on the Start space.

2. All players roll the cube. The player who rolls the highest amount goes first.

3. Players take turns. On your turn:

    a. roll the number cube

    b. determine the number before the number on the cube and move your token to the next space containing the number before. **For example, if you roll a "8," move your token to the next "7".**

    c. If the next space to contain the number before is the winner space, then move to that space.

4. First player to reach the "Winner" space wins the game.
