

Reading Numerals from 0 to 1000

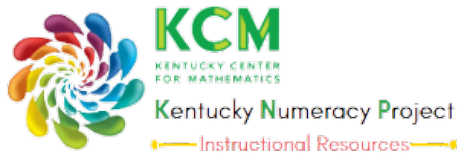

I am learning to read all 1, 2, and 3 digit numerals.

Materials:

Assorted numeral cards in range 0-1000 [a set of ten numeral cards (consecutive or non-consecutive) per student]

Directions:

1. Read approximately 10 numeral cards, aloud, as shown by teacher or partner.
2. Once the 10 number have been read aloud, place it on a table; face up, in a random order.
3. Put the 10 numeral cards in order and then read them aloud. (Numerals may be consecutive or non-consecutive.)
