

How Much?

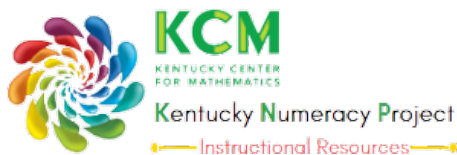

I am learning to recognize numerals 1 to 100 and match quantities to them.

Materials:

numeral cards 1-100; a container with 10 full ten-frame cards and a separate container with several cards for each of the quantities 1-9

Directions:

1. Find and show the ten frame that matches the numeral card teacher in holding up.
2. Count the dots on the ten frame to make sure you have chosen the correct one.
3. Repeat activity until all the students have had a chance to answer.
