

Arrow Cards (100 to 999)

I am learning to read and tell which selected numerals from the range of 100 to 999 are greatest.

Materials:

arrow cards: one set of ones, tens and hundreds arrow cards per small group

Directions:

1. Place each type of arrow card in a stack face down. There will be 3 stacks.
2. Each player will draw 1 arrow card from each stack, place cards together to make a number and read the number.
3. Players work together to put numbers in order.
4. The player who created the largest number gets a point.
5. Shuffle cards and replay.
