

Turkey Feathers

I am learning to compare quantities and match a quantity to a numeral in the range 1 to 12.

Materials:

turkey and feathers pattern, more/less spinner, scissors, glue, paper, pencil, dice

Directions:

1. Roll two dice, determine the total, and place that many feathers on one turkey.
2. Pair up with another student and compare your total numbers (without looking at your turkeys).
3. Spin the "more/less" spinner. If the spinner lands on "more", the student who has more feathers on their turkey wins the round. If the spinner lands on "less", the student with less feathers on their turkey wins the round.
4. Explain how you knew you won the round if asked by the teacher.
5. Find a new partner and repeat the activity.
