

Turkey Feathers

I am learning to compare and read numerals up to 100.

Materials:

numeral cards 10 to 100, numeral roll (see link for 113.5 for instructions)

Directions:

1. Shuffle cards and deal equally among the players. Each student puts their cards in a stack, face down.

2. Together, students turn over the top card on their stacks.

3. Say the number on your card. The student whose numeral is largest says "___ is more" and picks up all the cards.

4. After one time through the stack, count your cards to see how many cards you have. The student with the most cards wins.

* Students can use a numeral roll to determine which numeral is larger. Students can also use the numeral roll to compare the magnitude of the numbers, if necessary.
