

## Discriminating Numerals (up to 1000)

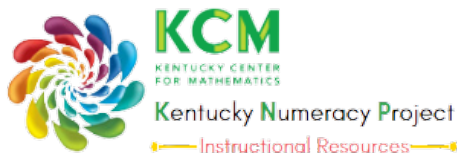

I am learning to read all 2 and 3 digit numerals.

### Materials:

numeral cards, at least 5 copies each of "34" "304" and "340" or other trio of numbers within 1000.

### Directions:

1. Choose 1 set of cards. Scatter cards, face-up, on the table.
2. Sort cards into piles. For example, for a deck containing "304"s and "340"s, place all of the "304"s in one pile and the "340"s in another pile.
3. Say the name of each numeral as you place it into the correct pile.
