

Fill the Pockets (up to 5)

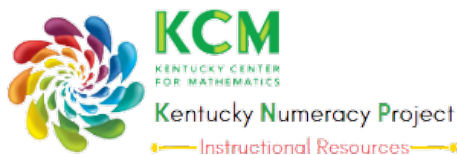

I am learning to read and match quantities and numerals to 5.

Materials:

dot cards or five frame cards with 0 to 5 dots - 2 or more each, game board

Directions:

1. Shuffle cards.
2. On your turn, draw 1 card. Say the amount out loud, then put the card in the matching pocket.
3. Take turns.
4. After all cards have been played, check each pocket one at a time to make sure all cards in the pocket match.
