

## Fill the Pockets (sums to 6)

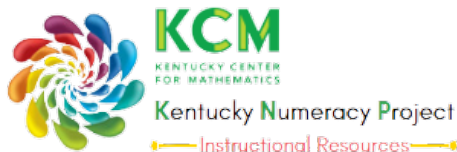

**I am learning to combine totals (addends up to 3) without counting.**

### **Materials:**

dot cards or five frame cards with 0 to 3 dots - 4 or more each, game board, paper clips.

### **Directions:**

1. Shuffle cards and stack in a pile.
2. On your turn, draw 2 card, add them together and then paper clip them.
4. Take turns.
5. After all cards have been played, each student predicts pairs of numbers located in each pocket.
6. After predictions remove the cards from the pockets and compare the answers to your predictions.
3. Place cards in the pocket on the game with the same total.
