

Match! (up to 5)

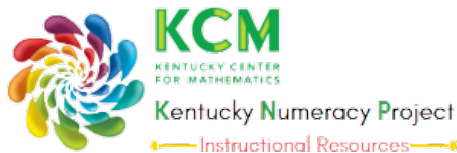

I am learning to read and match quantities and numerals to 5.

Materials:

"Match!" Game sheet, sheet protector, wipe off markers

Directions:

1. Work by yourself or with a partner
2. Use the dry-erase maker or crayon to circle matching pairs. A matching pair is made of one numeral and one five frame that are equal.
3. Work until every square has been used.
4. Erase your board. Choose a new board and play again.
