

Speed Make Five

I am learning to find pairs of numbers that add to make 5.

Materials:

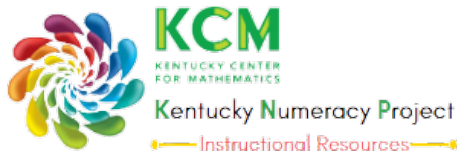

"Make Five" game sheet, sheet protectors, wipe off markers

Directions:

1. Work with a partner. Get the "Make Five" board and wipe-off markers or crayons.
2. One player choose "X" and the other choose "O".
3. To begin, players count down together "3, 2, 1 - Go".
4. At "Go", each player will race to mark pairs that add to 5 with either an X or an O.
5. Work until every square has been used. The winner is the player with the most squares marked.
6. Erase your board. Choose a new board and play again.

Alternate Game:

Each player will have 1 game board. At "Go", each player will circle pairs that make 5. The winner is the first student to use all of the squares on his/her board.
