

Problem Solvers

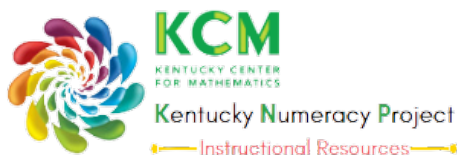

I am learning to model and solve word problems in the range of 1-10.

Materials:

question cards, number and symbol cards, bead rack

Directions:

1. Choose a bag of cards and put all of the cards in a stack, face down.
2. Draw a card.
3. Use the numeral cards to build an equation that matches the problem and find the answer.
4. Use a ten frame or bead rack to check (or help find) the answer.
5. Draw a different card and repeat.
