

Mystery Card

I am learning to tell you pairs of numbers that go together to make 5 without counting.

Materials:

5 frame cards - 4 each 0-5

Directions:

1. Get Five Frame cards, 0 to 5, 4 of each. Shuffle.
2. Player 1 remove the top card as the “mystery card” put the rest face down, place two cards in a row, face up.
3. Player 1 draws a card from the deck to see if they can use it and/or the two cards facing up to make five (use only 2 cards).
4. If they can't, they place the card on the table extending the line.
5. If they can, they keep the set. Replace cards from deck, so there are at least 2 cards facing up. Pick up no more than one pair in a turn.
6. Continue to make combinations until all cards but one have been used.
7. The last card should match the “Mystery” card to make 5.
