

## Match the Quantity

I am learning to match a numeral to a representation of the quantity (1 to 10).

### Materials:

numeral cards 1-10, a set of cards showing quantities 1 to 10 visually such as 10 frames, finger patterns or dot patterns

### Directions:

1. Get regular dot cards and numeral cards, 1 to 10, 6 of each. Shuffle.
2. Place the numeral cards and dot cards face down.
3. Player 1 turns over two cards, one of each color. If the cards match player 1 takes the pair.
4. If they do not match, the cards are turned back over.
5. Player 2 takes a turn.
6. Players take turns until all the pairs are found.
7. The player with the most pairs wins the game.
