Match the Quantity

I am learning to match a numeral (1 to 10) to the doubles or near-doubles expression.

Materials:

numeral cards and doubles expressions cards 1-10 only

Directions:

1. Get double expression cards and numeral cards, 1 to 10. Shuffle.

2. Place the numeral cards and double expression cards face down.

3. Player 1 turns over two cards, one of each color. If the cards match player 1 takes the pair.

4. If they do not match, the cards are turned back over.

5. Player 2 takes a turn.

6. Players take turns until all the pairs are found.

7. The player with the most pairs wins the game.
