

Combinations

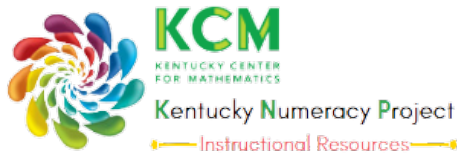

I am learning to tell the combinations of 6, 7, 8, 9, 10 when shown one quantity in the form of dots.

Materials:

5-plus combination dot cards (other combination cards available as well)

Directions:

1. Get 5-plus combination dot cards. Shuffle.
2. Player 1 takes a 5-plus combination card and opens one flap.
3. Player 1 tells the number that goes with it to make the total at the top.
4. Player 2 takes a 5-plus combination card and opens one flap.
5. Player 2 tells the number that goes with it to make the total at the top.
6. Next time the card is used, open the other flap.
