# <u>Combinations</u>

I am learning to tell the combinations of 6, 7, 8, 9, 10 when given one number in the form of bare numerals.

Materials:

combinations of 10 cards with numerals

Directions:

1. Get combination of 10 cards. Shuffle.

2. Player 1 takes a combination of 10 cards and opens one flap.

3. Player 1 tells the number that goes with it to make the total at the top.

4. Player 2 takes a combination of 10 cards and opens one flap.

5. Player 2 tells the number that goes with it to make the total at the top.

6. Next time the card is used, open the other flap.
