

## Combinations

I am learning to tell the combinations of numerals from 11-20 given one number in the form of bare numerals.

### Materials:

10-plus combination cards with numerals

### Directions:

1. Get 10 plus combination cards. Shuffle.
2. Player 1 takes a 10 plus combination card and opens one flap.
3. Player 1 tells the number that goes with it to make the total at the top.
4. Player 2 takes a 10 plus combination card and opens one flap.
5. Player 2 tells the number that goes with it to make the total at the top.
6. Next time the card is used, open the other flap.
