

Find the Target (up to 5)

I am learning to read and match quantities and numerals to 5.

Materials:

1 set dot cards, 0 to 5 with corresponding numeral on the back; number cube with numerals 0,1,2,3,4,5

Directions:

1. Get cards and cube.
2. Place cards face-up on the table.
3. Player 1 rolls the cube and says the number aloud.
4. Player 2 chooses a card showing that quantity. Players will turn card over to see if the number matches the number on the cube.
5. Players switch places and begin again.
6. Players continue to take turns.

One player directions:

Roll the cube. Find a card that matches the number rolled. Play again.
