

Make the Target (up to 10)

I am learning to find the number needed to add to make a given total to 10.

Materials:

5 frame cards, 2 each of 1 through 5; cube with numerals 6, 7, 7, 8, 9, 10.

Directions:

1. Get 5 frame cards and cube.
2. Place cards face up on the table.
3. Player 1 rolls the cube to find the target number.
4. Player 1 chooses a card to be the first addend.
5. Player 2 chooses a card that will go with the first addend to make the target number.
6. Players switch places and begin again.
7. Players continue to take turns.

One player directions:

Roll the cube. Find two cards that add to make the number rolled. Play again.
