

Bingo

I am learning to recognize amounts flashed on a 20 frame.

Materials:

Bingo Boards, Bingo covers, 20 frames (big enough for flashing) with 10 to 20 dots, expression cards for doubles

Directions:

1. Get Bingo card, covers and 20 frames.
2. Give each student a Bingo Card.
3. Player 1 flashes a 20 frame card, then places it face down
4. Players place a chip on ONE square matching the amount that is on the 20 frame card..
5. Players continue flashing 20 frame cards and covering amount on board.
6. Game ends when a student has 5 in a row, across, down, or diagonally.
