Bingo

I am learning to determine doubles and near doubles with totals in the range of 10 to 20 without counting by ones.

Materials:

Bingo Boards, Bingo covers, expression cards for doubles & near doubles

Directions:

1. Get Bingo card, covers and expression cards.

2. Give each student a Bingo Card.

3. Player 1 chooses an expression card and reads the expression.

4. Players place a chip on ONE square matching the total amount.

5. Players continue reading expression cards and covering amount on board.

6. Game ends when a student has 5 in a row, across, down, or diagonally.
