

## Card on My Forehead

**I am learning to determine a missing addend for totals equal to 5.**

### **Materials:**

5 frame cards 1 or 2 each of 0 to 5

### **Directions:**

1. Get 5 frame cards, shuffle and put in stack face down.
2. Player 1 picks up a card and places it on her forehead without looking at the card.
3. Player 2 looks at the card, states what goes with the amount shown to make 5.
4. Player 1, still without looking at his/her card, states what is shown on the card.
5. Player 1 then checks to see if correct. If correct, player 1 gets a point. If player 2 gave the wrong missing addend, then player 1 gets a point.
6. Players switch roles and play again until stack is used.
7. Player with the most points wins.
