

Quick Images

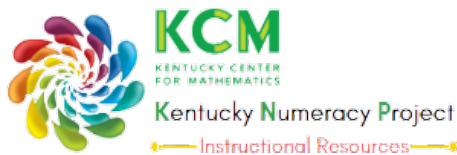

I am learning to subitize quantities to 5.

Materials:

regular dot cards to 6, dot cards showing up to 5 dots in either 1 or 2 colors in any arrangement and/or dominoes with totals up to 5

Directions:

1. Put all the dot cards in a stack.
2. Show your partner each card very quickly, one at a time, and ask your partner to tell you how many dots he or she saw.
3. If your partner makes a mistake, ask him or her to try again.
4. Take turns.
