

## Quick Images

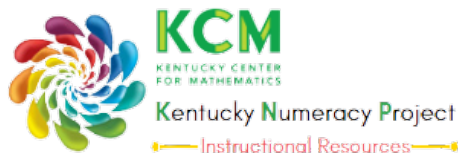

I am learning to quickly determine the number of dots in a flashed image with up to 10 dots.

### Materials:

dot cards showing up to 10 dots in either 1 or 2 colors, dominoes with totals up to 10 and/or 10 frame cards

### Directions:

1. Put all the dot cards in a stack.
2. Show your partner each card very quickly, one at a time, and ask your partner to tell you how many dots he or she saw.
3. Also ask your partner how many dots he or she saw of each color.
4. If your partner makes a mistake, ask him or her to try again.
5. Take turns.
