

## Quick Images

I am learning to recognize quantities 11 to 20 shown in either a ten-wise or pair-wise structure.

### Materials:

double 10 frame or twenty frame cards showing up to 20 dots in a pair-wise or ten-wise arrangement or a double bead rack

### Directions:

1. Put all the dot cards in a stack or get out the 20-bead rack.
2. Show your partner each card very quickly, one at a time, and ask your partner to tell you how many dots he or she saw; or quickly show a quantity on the bead rack to your partner and ask your partner to tell you how many beads he or she saw.
3. Also ask your partner how many dots or beads he or she saw of each color.
4. If your partner makes a mistake, ask him or her to try again.
5. Take turns.
