

Quick Images

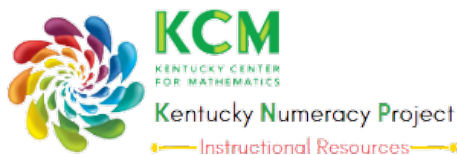

I am learning to fluently add two sets of dots or beads when each set is 10 or less.

Materials:

10 frames (1 to 10 - 2 each) or bead rack with 2 rows of 10 beads

Directions:

1. Get the cards from the folder and put in a stack, face down.
2. Take 2 cards from the stack and put them under your cover.
3. Quickly show your partner the cards and then cover the cards back up.
4. Ask your partner how many dots there are altogether.
5. Take turns.
