

Counting Counters

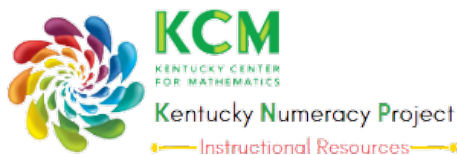

I am learning to tell how many in a set to 20

Materials:

Counters - 20 of all the same color

Directions:

1. Get 20 counters of the same color.
2. Player 1 puts some of the counters on the table and spreads them out.
3. Player 2 tells how many counters are on the table.
4. Player 1 and 2 switch jobs and start again.
