

Counting Counters

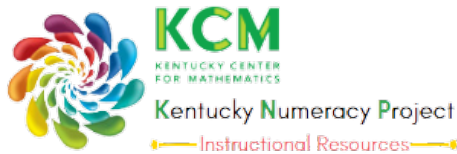

I am learning to tell the total of two collections within 20.

Materials:

1 set of red and 1 set of blue counters.

Directions:

1. Get red and blue counters.
2. Player 1 puts some of the blue counters on the table and a smaller number of red counters next to the blue.
3. Player 2 tells how many counters are on the table all together.
4. Player 1 and 2 switch jobs and start again.
