

Counting Counters

I am learning to tell the total of two collections within 20 when screened.

Materials:

2 sets of counters (1 set of red and 1 set of blue), 2 screens to cover

Directions:

1. Get red and blue counters and 2 screens.
2. Player 1 puts 7-9 red counters on the table and tells the number. Cover with a screen.
3. Player 1 puts 2-5 blue counters on the table and tells the number. Cover with a screen.
4. Player 2 tells how many counters all together are under the two screens.
5. Player 1 uncovers the screens to check the number.
6. Player 1 and 2 switch jobs and start again.
