

Removing Counters

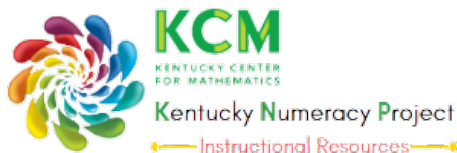

I am learning to subtract by counting back (up to 20) and I am learning to write the matching subtraction equation.

Materials:

one set of same color counters with two screens to cover

Directions:

1. The teacher will show you up to 20 counters.
2. While covering the counters the teacher will remove between 1-6 counters from the original amount.
3. Tell how many counters are left.
4. Write the matching subtraction equation.
