

Fill 20 Game (covered)

I am learning to add within 20 when the first collection is visible and the second collection is hidden.

Materials:

"Fill 20" game board, 20 counters or pennies per player, numeral cube

Directions:

1. Get a game board, bag of counters, and cover for you and your partner from the folder.
2. On your first turn, roll the number cube and put that many counters on your game board. Tell your partner how many counters are on your game board and then cover your board.
3. Take turns with your partner.
4. On your next turn, roll the number cube. Make a prediction on how many counters you will have on your board altogether when you add that many counters to your game board.
5. Take the cover off your game board, put the counters on, and check your prediction.
6. Take turns with your partner.
7. The first player to fill a game board wins!
