

## Fill 20 Game (find the difference)

I am learning to subtract within 20 using the more efficient counting strategy.

### Materials:

"Fill 20" game board, 20 counters per player, 1 cube labeled "10, 10, 11, 12, 13, 14" and another labeled "10, 11, 12, 13, 14, 14"

### Directions:

1. Get a game board and bag of counters for you and your partner from the folder.
2. On your turn, roll both number cubes and find the difference between the numbers and put that many counters on your game board.
3. Take turns with your partner.
4. The first player to fill a game board wins.
