

Task Group: How Many?

Kentucky Academic Standard(s): [KY.K.CC.4](#), [KY.K.CC.5](#), [KY.K.OA.1](#)

Numeracy Target: Count visible items to 20

How Many?

I am learning to count up to 3 groups of items and tell how many.

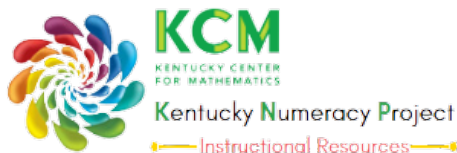

Materials:

numeral cards, working mat, counters

Directions:

1. Get the numeral cards and working mat from the folder.
2. Mix the cards up, and put them face down in front of you.
3. Draw 3 numeral cards. Put them in the boxes on your working mat.
4. Fill each box below the numeral cards with that many counters.
5. Count all the counters and tell your partner or teacher how many counters you have.
6. Clear your mat and repeat with 3 new numeral cards.

* To make this a partner game, give each student a working mat. Have them follow the above directions. When each student totals his/her counters, the student with the most/least gets a point (K.CC.6). Play until one student has 5 points.
